Ait-Ameur Ilyas — Backend & Machine Learning Engineer

Douera, Algiers | +213 560 30 84 52 | aitameurilyas@gmail.com | azsu-rae.github.io

SUMMARY

Software engineer and Master's student in Applied AI, with backend experience in Python/Django/FastAPI and systems-level work in Java. Building projects that combine backend architecture with applied ML; document processing pipelines, content moderation, model deployment. Comfortable across Unix environments and distributed systems.

EDUCATION

Univerity of M'hamed Bougara — Boumerdes, Algeria
Master's Degree in Applied Artificial Intelligence — Sep 2022 — Jun 2027

- **Licence:**
  - **End-of-Cycle Project:** An educational study of the Q-learning algorithm (Reinforcement Learning)
  - Top 3 (class of 2025)
- **Relevant Coursework:** Data Science, Machine Learning, Image Processing & Analysis , Deep Learning, Optimization & Metaheuristics, Stochastic Process, Microservice Architectures, High Performance Computing.

EXPERIENCE

TruthShield - Misinformation Fighting Non-profit — Boumerdes
Technical Co-Founder — May 2026 — June 2027

- Working on developing misinformation fighting solutions
- Led introductory programming workshops

Huawei Software Solutions Sales Dept — Bab Ezzouar, Algiers
Software Engineer Intern — Sep 2025 — Nov 2025

- Worked on Mobile Money, E-payment, and AI-powered CRM solutions
- Made PPTs with insights into local market
- Participated in B2B Sales processes and proofread documents

SOFTWARE PROJECTS

Riwaq

Knowledge base hub for Algerian university students

Stack: Django · PostgreSQL

WhatAmIWorth

Judgemental grade average calculator open to contributions to eventually build a national database of university programs

Stack: React · FastAPI

TA

A grading, attendance, and assiduity management tool for university professors

Stack: JavaFX · YADL · SQLite

YADL

A lightweight SQLite ORM with a powerful reflection-based API that includes search capabilities and JSON serialization.

Stack: Java · JDBC · SQLite

TECHNICAL SKILLS

- **Languages:** Python · Java · JavaScript · C · Rust
- **Technologies:** FastAPI · Django · PostgreSQL · Docker · PyTorch · Pandas · NumPy · OpenCV · React · HTML · CSS
- **Linux:** Arch & Debian environments · Vim · Bash Scripting · ssh · Tmux
- **Developer Tooling:** (Neo)Vim · Git · Make · Bruno (HTTP Client)
- **Document & Presentation Tooling:** LaTex · Typst · Marp (Markdown-based slideshows for code presentations)

NOTABLE ADDITIONS

- Fluent in Arabic, French, and English
- Competitive programming enthusiast
